Professional Summary

AI/Technical Program Manager with 1.5+ years at Cars24 owning voicebot and chatbot delivery end-to-end — writing prompts, running E2E testing, and driving features from requirement to production. Programs shipped: price-negotiation voicebot (3,500+ calls/day, ~33% conversion rate), LLM chatbot QA pipeline, pre-inspection analytics dashboard, and Zendesk automations (1,500+ tickets/month). Managed 3-pod Agile delivery for 12 engineers. MBA in Business Analytics.

Experience

AI/Technical Program Manager, Cars24 — Gurugram, Haryana Jan 2025 – Present

- Led 3-pod delivery for a 12-engineer team: groomed ~480 story points/sprint (Fibonacci), maintained RAID logs, and resolved cross-functional blockers across Product, Engineering, and Business.
- Authored PRDs and Figma flows for AI Voicebot (price negotiation) and CeX Chatbot (price query + auto-ticketing) — defined negotiation flows, fallback responses, and RA handoff conditions end-to-end.
- Wrote, tested, and shipped prompts for Agentic AI price-negotiation voicebot handling 3,500+ calls/day: achieved ~33% conversion rate (on par with manual RAs), with most deals closing within 2 days; eliminated RA touchpoints from negotiation.
- Built LLM-powered conversation audit pipeline using OpenAI API — processes 225 sessions/day (~7,000 rows), auto-classifies 10+ intent/issue categories, generates QA reports in 15–30 min; replaced 2 analysts spending 8 hrs/day on only 30–40 manual cases.
- Built and shipped Pre-Inspection analytics dashboard (2,700 sessions/month) and two Zendesk automations: Challan Ticket Closure (~50 tickets/day, 1,500+/month) + Agent Performance Report for 33 agents — replaced 30 min of daily manual Explore workflow.
- Managed ECS→EKS (90+ services in 1 month) and Bitbucket→GitHub (1,500+ services in 1.5 months) migrations end-to-end with structured risk logs and leadership reporting.

Research Analyst, 99acres.com — Noida, Uttar Pradesh Jul 2024 – Oct 2024

- Analyzed 24,000+ property listings for a team of 12 within a 3-month window using Google Maps, RERA, and govt. datasets for geospatial and data quality validation.

Power BI & SQL Intern, CODTECH IT Solutions — Gwalior, MP May 2024 – Jul 2024

- Built Sales, HR, and Marketing ROI dashboards in Power BI; wrote SQL queries for data extraction and reporting across 3 business functions.

Key Projects

ChallanBot — Challan Automation Panel Cars24 — Under Testing | GitHub

- Independently designed and built a Challan Automation Panel using Claude AI and Figma — takes an Appointment ID, auto-fetches vehicle details (Reg No, Chassis No, Engine No) via GET API, then runs automated checks across government websites to retrieve traffic challans for 60+ QC operators; under review by Challan QC team.

ConvoAudit — LLM Chatbot QA Pipeline Cars24

- Processes 225 sessions/day (7,000 rows): classifies intent/issues, generates daily QA reports in 15–30 min — replaced 2 analysts spending 8 hrs/day to manually audit only 30–40 cases.

PreInspect AI — Conversational Analytics Dashboard Live: Netlify/Vercel

- Tracks 2,700 sessions/month with sentiment cross-filter, cancellation funnel, and regional drill-downs; primary monitoring tool for CeX and Inspection team leadership.

Skills

Product Management: PRD Writing, Figma, OKRs/KPIs, Stakeholder Management, Product Roadmapping, Agile (Scrum/Kanban), Jira, Confluence, RAID Logs, Release Management, SDLC

AI & Tools: Prompt Engineering, Voicebot & Chatbot Prompting, LLM API Integration, E2E Testing, OpenAI API, Claude AI, Playwright, Power BI, SQL, REST APIs, Git, Netlify, Vercel, Railway, MongoDB, AWS S3

Education

PIMR, Gwalior — MBA in Business Analytics Aug 2023 – May 2025

Jiwaji University, Gwalior — B.Sc in Mathematics Aug 2019 – Jul 2022

Certification: Atlassian Agile Project Management Professional Certificate
